TECHNICAL SKILLS

- **Languages:** Python (Proficient), Java, C
- **Web Development:** Django (Backend), React (Frontend)
- **Data Analysis Tools**: Pandas, JSON
- **Others:** Operating System, Git

EDUCATION

Guru Brahma Nand Ji Govt. Polytechnic, Nilokheri, Karnal

- Diploma in Computer Engineering (2024) **Percentage: 83%**
- Courses: Python, Java, DBMS, OOPs, C, Operating System

Govt. Sr. Sec. School, Tehsil Camp, Panipat

- 12th Non-Medical (2021) **Percentage: 90%**
- 10th **Percentage: 70%**
- Automobile Technician

PROJECTS

Inventory Management System | Python | Pandas

- Developed an Inventory Management System using **Pandas** and **JSON** module.
- It has admin functionality where we can add/delete/view/update the data and admins.
- User functionality where we can purchase the products and generates the bill.

Web Scrap Portal | Python | React

- Built a Web Scrape Portal using Python (backend) and React (frontend)
- It scrapes the given URLs and extracts the data from URL and presents the data of that particular website.

Password Generator | Python

- I developed a Password Generator system using arrays and random module where we can generate the password with giving the user input (password length).

EXPERIENCE

VproTech Digital

- Completed two months of training in Python Programming Language.
- Duration: (August 10, 2023 – October 6, 2024)

BPO | iEnergizer

- Handled inbound and outbound customer interactions via calls/emails.
- Demonstrated strong communication, problem-solving, and customer-handling skills.
- Resolved customer queries efficiently while maintaining service quality standards.
- Achieved individual and team performance targets.
